Just glycols and glycol ethers C1 to C9, 1 ml of each, neat, ~ 20 compounds per kit. It will take too long to order a custom of 2methoxyethanol which someone just decided on Thu they wanted analysis for at Dimock.....so it's easier to buy the whole kit!
Accu and Ultra have approx the same compounds in them

I mentioned it to Robin in the meeting today but forgot to tell you, sorry ...and thanks
Jennie

Subject: See you need kit and stds. quickly

Any idea of the reagents in the kit? I would think there would not be a large amount anyway? Also any idea the amount of the neat material for standards?
